SOVIET MATHEMATICS — DOKLADY

ANNUAL INDEX OF AUTHORS

Volume 38-39 January-December 1989 Russian Toms 301–306

Abdrakhimova, N. R., Guts, A. K., and Shalamova, N. L. *The synthetic theory of affine Lorentz manifolds and ordered Lie groups*..... 38 583

Abduvaliev, A. O., Rozov, N. Kh., and Sushko, V. G. *Asymptotic representations of solutions of certain singularly perturbed boundary-value problems*..... 39 127

Abramov, N. N. and Kucherenko, V. V. *An algorithm for numerical solution of the Dirichlet problem*..... 39 302

Abramovich, Yu. A., Arenson, E. L., and Kitover, A. K. *Operators on Banach $C(K)$-modules and their spectral properties*..... 38 93

Agadzhanov, A. N. *Functional properties of Sobolev spaces of infinite order*..... 38 88

Aleksandrov, A. B. *Orthogonal bases of inner functions*..... 39 463

Aleksandrov, I. A. *Estimates of the coefficients of bounded univalent functions with rotational symmetry*..... 39 503

Aleksanyan, A. A. *Realization of Boolean functions by disjunctions of products of linear forms*..... 39 131

Alekseev, V. A. and Nikulin, V. V. *Classification of del Pezzo surfaces with log-terminal singularities of index ≤ 2, and involutions on $K3$ surfaces*..... 39 507

Aleshin, N. P., Kamenskiĭ, D. V., Kamenskiĭ, V. S., and Mogil'ner, L. Yu. *Diffraction of an elastic wave by a stress-free disk*..... 38 323

Aliev, F. A., Bordyug, B. A., and Larin, V. B. *Orthogonal projections and the solution of a matrix algebraic Riccati equation*..... 38 531

Aliev, R. M. *Application of projection methods to the construction of best quadrature formulas on sets of solutions of boundary value problems* 39 306

———. *Best quadrature formulas for some classes of differentiable functions*..... 39 415

Aliev, Z. S. See Makhmudov, A. P.

Allakhverdiev, B. P. See Maksudov, F. G.

Almamedov, M. S. *On proper products of multiparameter matrix Sturm-Liouville equations*..... 39 229

———. *On the structure of the spectrum of selfadjoint multiparameter problems*..... 39 273

Amosov, A. A. and Zlotnik, A. A. *Global generalized solutions of the equations of the one-dimensional motion of a viscous heat-conducting gas* 38 1

Amrakhov, Sh. G. *On the theory of optimal control on an infinite time interval*..... 38 646

Anikonov, Yu. E. and Belov, Yu. Ya. *On unique solvability of an inverse problem for a parabolic equation*..... 39 601

Antontsev, S. N. and Dias, Kh. I. [Díaz, J. I.], *New results on localization of solutions of nonlinear elliptic and parabolic equations obtained by the energy method* 38 535
Arak, T. and Surgailis, D. *Polygonal Markov random fields* 38 284
Ardelyan, N. V. *Solvability and convergence of nonlinear difference schemes* 38 405
Arenson, E. L. See Abramovich, Yu. A.
Arsenin, V. Ya., Kriksin, Yu. A., and Timonov, A. A. *On a spectral approach to the construction of local regularization algorithms* 39 86
Arutyunov, A. V. *On the theory of the maximum principle in optimal control problems with phase constraints* 39 1
Aseev, V. V. *Quasiconformal extension of quasi-Möbius imbeddings in the plane* 38 288
Atakhodzhaev, M. A. *On nonuniqueness of the solution of an ill-posed problem for the biharmonic equation* 39 420
Azarin, V. S. and Giner, V. B. *On the completeness of systems of exponentials in convex domains* 39 225
Babenko, K. I., Petrovich, V. Yu., and Rakhmanov, A. I. *A computational experiment in the theory of surface waves of finite amplitude* 38 327
———. *On a demonstrative experiment in the theory of surface waves of finite amplitude* 38 626
Baĭkov, V. A., Gazizov, R. K., and Ibragimov, N. Kh. *Linearization and formal symmetries of the Korteweg-de Vries equation* 38 588
Baĭramov, R. A. See Feĭzullaev, R. B.
Bakaev, N. Yu. *Stability theory of aduitive difference schemes in Banach spaces* 39 233
Balabanov, O. V. and Pashintsev, V. T. *On the use of a variational invariance principle in numerical methods of optimizing controls in the presence of terminal constraints* 38 540
Baris, Ya. S. *On a method of constructing approximate integral manifolds* 38 57
Bastis, A. Ĭ. *On the generalized localization principle for the N-fold Fourier integral in L_p-classes* 39 91
Belov, Yu. A. and Kas'yanyuk, V. S. *On the set of values of a system of linear functionals in terms of the data of another system of linear functionals* 39 5
Belov, Yu. Ya. See Anikonov, Yu. E.
Belykh, V. N. *Algorithms without saturation in the problem of numerical integration* 39 95
Berestovskiĭ, V. N. *Homogeneous spaces with intrinsic metric* 38 60
Bezmenov, I. V. See Rusanov, V. V.
Bitsadze, A. V. *Integral equations of the first kind with singular kernels generated by the Schwarz kernel* 38 188
———. *On integral equations of the linear theory of contact problems* ... 38 496
Blatov, I. A. and Strygin, V. V. *The spline-collocation method on adaptive meshes for singularly perturbed boundary value problems* 39 136
Blokh, A. M. and Lyubich, M. Yu. *Absence of wandering intervals in one-dimensional smooth dynamical systems* 39 169
Bogatyreva, N. A. and Pyatnitskiĭ, E. S. *The minimax principle of mechanics and its application to optimal control problems* 39 99
Boĭmatov, K. Kh. *Coercive estimates and separation for second order elliptic differential equations* 38 157

Bolsinov, A. V. *A completeness criterion for a family of functions in involution constructed by the argument shift method* 38 161
Bordyug, B. A. See Aliev, F. A.
Borichev, A. A. *Convolution equations and the structure of* 1- *and* 2-*invariant subspaces in a scale of spaces of rough growth* 39 140
Borisov, V. F. *Construction of an optimal synthesis in the presence of a chattering regime* 38 332
———. See Zelikin, M. I.
Bovdi, A. A. *On the structure of the multiplicative group of an integral group ring* 38 195
Braginskiĭ, R. P., Gnedenko, B. V., Malunov, V. V., Moiseev, Yu. V., and Molchanov, S. A. *Features of a percolation model of the aging of polymers* 38 546
Braginskiĭ, R. P., Gnedenko, B. V., Zaĭtseva, G. M., and Molchanov, S. A. *Theoretical and statistical investigation of the defect set in enamel-lacquer electrically insulating coatings* 38 501
Bugir, M. K. *Oscillation conditions for equations of the form* $L^k u + c(x, u) = f(x)$ 39 104
Bugrov, Ya. S. *Absolute summability of Fourier transforms and absolute convergence of multiple Fourier series* 38 360
Burenkov, V. I., Dorofeev, I. F., and Pankratov, A. S. *Estimates of regularized solutions of equations of convolution type in function spaces with noninteger order of differentiation* 38 506
Buslaev, A. P. *Extremal problems of approximation theory, and nonlinear oscillations* 39 379
Bykovskiĭ, V. A. *The discrete Fourier transform and the cyclic convolution on integral lattices* 38 237
Chan Dyk Van [Trần Đú'c Vân] and Kha Zuĭ Bang [Hà Duy Bang], *On the solvability of nonlinear differential equations of infinite order in unbounded domains* 39 268
Chepyzhov, V. V. *Unbounded attractors of some parabolic systems of differential equations and estimates of their dimension* 38 39
Cheremshantsev, S. E. *Asymptotic completeness in the three-dimensional problem of scattering by a Brownian particle* 38 43
Cherepanov, G. P. See Cherepanova, L. Ya.
Cherepanova, L. Ya. and Cherepanov, G. P. *A mathematical information model of fluctuation of personnel* 38 618
Chernousov, V. I. *On the Hasse principle for groups of type* E_8 ..... 39 592
Chichinadze, V. K. and Chumburidze, G. G. *On a method for solving the problem of global optimization of functionals* 38 312
Chikvinidze, L. N. *On the approximation of functions, in domains with a quasiconformal boundary, in weighted plane integral metrics* 39 32
Chistov, A. L. *The complexity of constructing the ring of integers of a global field* 39 597
Chumburidze, G. G. See Chichinadze, V. K.
Davydov, O. V. *Asymptotic behavior of best approximations of individual functions in the classes* $W^r H_\omega$ *in the* L_p*-metric* 39 541
Dektyarev, I. M. *Curves of finite order and divisors with maximum defect value* 39 545
Dem'yanov, V. F. *Codifferentiability and codifferentials of nonsmooth functions* 38 631

Denisov, V. N. *Some questions of the stabilization of means of a solution of the Cauchy problem for hyperbolic equations* 39 108
Desyat·skova, N. V. *Imbedding theorems and widths of some weighted classes of smooth functions* 38 412
Dias, Kh. I. [Díaz, J. I.], See Antontsev, S. N.
Donin, I. F. *Decompositions of tensor products of representations of the symmetric group and symmetric and exterior powers of the adjoint representation of* $\mathfrak{gl}(N)$ 38 654
Dorfman, I. Ya. *The Krichever-Novikov equation and local symplectic structures* 38 340
Dorofeev, I. F. See Burenkov, V. I.
Dubinskiĭ, Yu. A. *On the necessity of the Kovalevskaya conditions and their generalizations* 39 42
———. *On well-posedness of the Cauchy problem in classes of entire functions of finite order* 38 206
Dzhabbarzade, V. M. See Feĭzullaev, R. B.
Dzhumaev, S. *On the question of discretization of a class of linear equations* 38 337
Dzhuraev, A. *On mixed problems for first order hyperbolic systems* 38 418
Efremovich, V. A. *On qualitative properties of figures* 38 377
Egorov, I. E. *A boundary value problem for a higher-order equation with changing time direction* 38 659
Elizarov, A. I. *On the moments of the number of stationary points of a homogeneous Gaussian field* 38 270
Elkin, V. I. *On the classification of affine control systems with phase space of dimension* $n < 4$ 38 245
Ermakov, S. M., Zhiglyavskiĭ, A. A., and Kondratovich, M. V. *Reduction of the problem of random estimation of an extremum of a function* .. 38 344
Fedorchuk, V. V. *Fibrations of spaces of probability measures, and the geometry of infinite iterations of certain monadic functors* 38 35
Fedotov, A. M. and Lepshokov, S. I. *A minimax regularizing algorithm for solving an equation of convolution type* 39 588
Feĭzullaev, R. B., Baĭramov, R. A., and Dzhabbarzade, V. M. *On simplified recognition of functional completeness of an algebra under restrictions on the generated variety* 38 266
Fel′dman, G. M. *A characterization of the Gaussian distribution on groups by independence of linear statistics* 38 131
Filatov, A. N. See Il′in, A. A.
Gabov, S. A. *On a form of nonlinear waves described by the Dubreil-Jacotin equation* 38 363
Galaktionov, V. A., Kurdyumov, S. P., and Samarskiĭ, A. A. *On the structure of limit distributions of unbounded solutions of quasilinear parabolic equations* 38 138
Gal′perin, G. A. *On the concept of the center of mass of a system of point-masses in spaces of constant curvature* 38 367
Ganikhodzhaev, N. N. See Sarymsakov, T. A.
Gareeva, T. M. See Pokornyĭ, Yu. V.
Gashkov, I. B. and Sidel′nikov, V. M. *Codes connected with a group of linear-fractional transformations* 38 166
Gazizov, R. K. See Baĭkov, V. A.

Gel'fand, I. M., Zelevinskiĭ, A. V., and Kapranov, M. M. *Projectively dual varieties and hyperdeterminants* 39 385
Gel'fand, I. M., Zelevinskiĭ, A. V., and Serganova, V. V. *General hypergeometric functions associated with a pair of homogeneous spaces* 39 182
Getsadze, R. D. *On the divergence in measure of general multiple orthogonal Fourier series* 39 430
Gevorkyan, G. G. *Some theorems on unconditional convergence and a majorant for Franklin series, and their application to the spaces* Re H_p 38 409
Giner, V. B. See Azarin, V. S.
Gnedenko, B. V. See Braginskiĭ, R. P.
Gomonov, S. A. *On cluster sets of multivalued mappings of topological spaces* 39 425
Goncharskiĭ, A. V. and Stepanov, V. V. *On an inverse problem in the formation of coherent radiation* 38 511
Gorban', A. N. See Verbitskiĭ, V. I.
Gorbatsevich, V. V. *On some classes of homogeneous spaces close to compact* 38 592
Gorelik, E. M. *Metric fibrations of Lobachevsky space* 38 202
Gorodniĭ, M. F. *On the limit behavior of solutions of a certain stochastic difference equation in Hilbert space* 38 6
Grigor'ev, D. Yu. *Complexity of computing the genus of a system of exterior differential equations* 39 432
———. *Complexity of factoring a linear ordinary differential operator*... 38 452
Guliev, V. S. *On certain classes of anisotropic integral operators and weighted imbedding theorems in a domain with nonsmooth boundary* 39 199
Gurevich, D. I. *Hecke symmetry and quantum determinants* 38 555
Gurvich, V. A. *Equilibrium in pure strategies* 38 597
———. *Extremal uniform hypergraphs. An estimate of the Zarankiewicz function and a criterion for the nondegeneracy of the function* ex..... 38 550
Gurvich, V. A. and Shabat, G. B. *Charts of surfaces and their schemes* .. 39 390
Guseĭnov, Kh. G. and Ushakov, V. N. *Strongly and weakly invariant sets with respect to a differential inclusion* 38 603
Gusevskiĭ, N. A. *Geometric decomposition of spatial Kleinian groups* 38 98
Gushchin, A. K. *On the Dirichlet problem for a second order elliptic equation* 38 372
Guts, A. K. See Abdrakhimova, N. R.
Ibragimov, I. A. and Khas'minskiĭ, R. Z. *Asymptotic normal families of experiments, and efficient estimates* 39 395
Ibragimov, N. Kh. See Baĭkov, V. A.
Igoshin, V. A. and Shapiro, Ya. L. *Quasigeodesic mapping and Riemannian gauge structure* 39 351
Il'in, A. A. and Filatov, A. N. *On unique solvability of the Navier-Stokes equations on the two-dimensional sphere* 38 9
Il'in, V. P. *On the rate of convergence of iterative methods of incomplete factorization* 38 102
Imanaliev, M. I. and Pankov, P. S. *Singularly perturbed systems of ordinary differential equations in cases where the "degenerate" systems have discontinuous solutions* 38 560
Iskenderov, A. D. and Yagubov, G. Ya. *A variational method for solving the inverse problem of determining the quantum-mechanical potential* 38 637

Ivanov, V. K. and Mel′nikova, I. V. *Construction of quasivalues for weakly well-posed problems* 39 514
Ivashkovich, S. M. *An extension theorem of Thullen type for line bundles with L^2-bounded curvature* 38 516
Ivchenko, G. I. *Divisible statistics and a class of stopping times for polynomial trials* 39 243
Ivriĭ, V. Ya. *Sharp spectral asymptotics for the two-dimensional Schrödinger operator with a strong magnetic field* 39 437
Kabanikhin, S. I. *Regularization of Volterra operator equations of the first kind with boundedly Lipschitz-continuous kernel* 39 549
Kabatyanskiĭ, G. A. and Panchenko, V. I. *Packings and coverings of Hamming space by unit spheres* 38 564
Kachalov, V. I. and Lomov, S. A. *On the analytic properties of solutions of differential equations with singular points* 39 12
Kalanchuk, R. I. *On the structure of a Monge manifold under indeterminacy of its geodesic shortest paths* 39 355
Kaliev, I. A. and Razinkov, E. N. *On a Stefan problem with phase relaxation* 39 471
Kalyakin, L. A. *The matching method in the problem of asymptotic decay of a plane wave packet in a dispersive medium* 38 174
Kamenskiĭ, D. V. See Aleshin, N. P.
Kamenskiĭ, V. S. See Aleshin, N. P.
Kaniovskiĭ, Yu. M. *On the limit distribution of processes of stochastic approximation type when the regression function has several roots* 38 210
Kanovich, M. I. *On constructivity of the logic of computational problems* 38 296
———. *On the semantics and logic of computational problems* 39 334
Kapovich, M. È. *On conformal structures with Fuchsian holonomy* 38 14
Kapranov, M. M. See Gel′fand, I. M.
Kapustin, N. Yu. *On a property of the W_2^2-solution of the Cauchy-Goursat problem* 38 106
———. *A problem for a parabolo-hyperbolic equation with a nonlocal condition for matching normal derivatives on the line of change of type*. 39 248
Karlovich, Yu. I. *C^*-algebras of operators of convolution type with discrete groups of shifts and oscillating coefficients* 38 301
———. *On algebras of singular integral operators with discrete groups of shifts in L_p-spaces* 39 48
Kashchenko, S. A. *On complicated periodic solutions of a system of differential-difference equations with small diffusion* 39 442
Kas′yanyuk, V. S. See Belov, Yu. A.
Kazaryan, K. S. *The Dirichlet problem in a weighted metric for the ball in R^n, $n \geq 3$* 38 170
Kazimirskiĭ, P. S. and Shchedrik, V. P. *On the solutions of one-sided matrix polynomial equations* 39 45
Kerimov, A. K. *On the dependence of solutions of boundary value problems on perturbation of the domain with respect to vector fields* 38 519
Kerov, S. V. See Vershik, A. M.
Kha Zuĭ Bang [Hà Duy Bang], See Chan Dyk Van [Trần Đú'c Vân]
Khabibullin, B. N. *On the growth of entire functions of exponential type along the imaginary axis* 38 276
Khaĭdarov A. *On stability estimates in multidimensional inverse problems for differential equations* 38 614

Kharison, V. [Harrison, W.], See Klimov, G. P.
Khas′minskiĭ, R. Z. *Markov control processes and optimization of random multiple-access algorithms* 38 184
———. See Ibragimov, I. A.
Kheĭfits, A. I. See Levin, B. Ya.
Kitover, A. K. See Abramovich, Yu. A.
Klimov, G. P. and Kharison, V. [Harrison, W.], *Intersection of random graphs* 38 347
———. *Reduction of process coupling to the intersection of control sequences* 38 380
Kochetkov, D. V. *Invariant decision functions* 38 567
Kokilashvili, V. M. *On fractional integrals on curves* 39 251
Kolesov, A. Yu. *Relaxation parabolic systems* 39 610
Kolesov, A. Yu., Kolesov, Yu. S., Mishchenko, E. F., and Rozov, N. Kh. *A mixing attractor in relaxation systems* 39 446
———. *Multi-dimensional relaxation oscillations in media with diffusion* 38 431
Kolesov, Yu. S. See Kolesov, A. Yu.
Kondratovich, M. V. See Ermakov, S. M.
Konyukhova, N. B. *On the existence of stable initial manifolds for systems of nonlinear functional-differential equations* 39 519
Korchagin, A. B. *New M-curves of degrees* 8 *and* 9 ..... 39 569
Korogodskiĭ, L. I. See Vaksman, L. L.
Kosmodem′yanskiĭ, Jr., A. A. *The behavior of solutions of the equation* $\Delta u = -1$ *in convex domains* 39 112
Kotlyar, Ya. M. *The equivalent equation method for solving nonlinear problems* 38 458
Kozhevnikov, A. N. *On the second and third boundary value problems of the static theory of elasticity* 38 427
Kozlov, V. V. *On polynomial integrals of a system of interacting particles* 38 143
Kriksin, Yu. A. See Arsenin, V. Ya.
Krushkal′, S. L. *On the question of the structure of the universal Teichmüller space* 38 435
Kubyshkin, E. P. *The method of infinite-dimensional normalization in the study of selfoscillatory solutions of a class of singularly perturbed boundary value problems* 39 573
Kucherenko, V. V. See Abramov, N. N.
Kudryavtsev, D. L. *Asymptotics of solutions of a linear second order differential equation with regular singular points* 39 149
Kurdyumov, S. P. See Galaktionov, V. A.
Kurina, G. A. *Asymptotics of the solution of a singularly perturbed matrix Riccati equation* 38 18
Kutev, N. D. See Popivanov, P. R.
Kuz′minykh, A. V. *A curve in* R^n, *homeomorphic to a line, that intersects every unbounded curve of bounded curvature* 39 358
Larin, V. B. See Aliev, F. A.
Lazarev, K. P. See Pokornyĭ, Yu. V.
Leont′ev, V. K. and Smetanin, Yu. G. *On the recovery of vectors from a collection of their fragments* 38 438
Lepp, R. È. *Approximation of the problem of stochastic programming with complete recursion* 39 400
Lepshokov, S. I. See Fedotov, A. M.

Lëtchikov, A. V. *A limit theorem for a recurrent random walk in a random environment* 39 15
Levendorskiĭ, S. Z. *On types of degenerate elliptic operators* 38 462
Levin, B. Ya. and Kheĭfits, A. I. *Asymptotic behavior of subfunctions of the Schrödinger operator in an n-dimensional cone* 38 109
Liseĭkin, V. D. and Petrenko, V. E. *On numerical solution of a quasilinear singularly perturbed equation with a turning point* 38 351
Liskovets, O. A. *Regularization of optimal control problems on ill-posed variational inequalities* 39 19
Litvinchev, I. S. *An iterative decomposition in dynamical problems with cross couplings* 39 578
Litvinko, P. G. See Rublev, B. V.
Logofet, D. O. *Do there exist diagonally stable matrices without dominating diagonal?* 38 113
Lomov, I. S. and Tikhomirov, V. V. *Estimates of root vectors of multipoint spectral problems* 38 662
Lomov, S. A. See Kachalov, V. I.
Lyashko, S. I. and Man′kovskiĭ, A. A. *Controllability of parabolic systems with impulsive action* 39 476
Lyubich, M. Yu. See Blokh, A. M.
Makhmudov, A. P. and Aliev, Z. S. *Nondifferentiable perturbations of spectral problems for a pair of selfadjoint operators, and global bifurcation* 38 122
Makhmudov, È. N. *Necessary conditions for optimal control problems described by differential inclusions with distributed parameters* 38 467
Makin, A. S. *On the mean value formula for eigenfunctions and associated functions of the Schrödinger operator* 39 54
Maksudov, F. G. and Allakhverdiev, B. P. *On the theory of the characteristic function and spectral analysis of a dissipative Schrödinger operator* 38 665
Malamud, M. M. *On extensions of Hermitian sectorial operators and dual pairs of contractions* 39 253
Malunov, V. V. See Braginskiĭ, R. P.
Mamedov, Yu. A. *On spectral problems for a system of ordinary differential equations that is not normal* 39 524
Man′kovskiĭ, A. A. See Lyashko, S. I.
Mansimov, K. B. *On the theory of necessary optimality conditions in a problem of controlling systems with distributed parameters* 38 116
Manturov, O. V. *Invariants of adjoint and coadjoint representations of semidirect Lie algebras* 39 311
Marenich, V. B. *The structure of open manifolds of nonnegative curvature* 39 404
Martynyuk, A. A. *A hierarchical matrix Lyapunov function and stability under structural perturbations* 39 260
Matveev, O. V. *On a method for solving polynomial equations in Banach spaces* 39 480
Matveev, S. V. *Complexity of three-dimensional manifolds and their enumeration in order of increasing complexity* 38 75
Mazurik, S. I. See Vorozhtsov, E. V.
Mel′nikova, I. V. See Ivanov, V. K.
Mikesh, Ĭ. *On the existence of n-dimensional compact Riemannian spaces admitting nontrivial global projective transformations* 39 315

Mikhaĭlov, G. A. and Zhiglyavskiĭ, A. A. *Uniform optimization of weighted estimates of the Monte Carlo method* 38 523
Mikhaĭlov, L. G. *A nonlinear generalized Cauchy-Riemann system with two independent complex variables* 38 571
Mikityuk, Ya. V. *On the singular spectrum for selfadjoint operators* 38 472
Mishchenko, E. F. See Kolesov, A. Yu.
Mogil′ner, L. Yu. See Aleshin, N. P.
Moiseev, N. G. *On factorization of matrix-valued functions of special form* 39 264
Moiseev, Yu. V. See Braginskiĭ, R. P.
Molchanov, S. A. See Braginskiĭ, R. P.
Morozov, A. S. *Elementary properties of groups of recursive permutations* 39 282
Motylev, L. Yu. *An asymptotic method for ordinary differential equations with a turning point of infinite order* 39 23
Muraveĭ, L. A. *The wave equation in an unbounded domain with a star-shaped boundary* 38 527
Nagaev, S. V. *An estimate of Berry-Esseen type for sums of random variables with values in Hilbert space* 38 476
———. *Ergodic theorems for homogeneous Markov chains* 39 483
Nasibov, Sh. M. *On a nonlinear Schrödinger equation with a dissipative term* 39 59
Naumkin, P. I. and Shishmarev, I. A. *The system of equations for surface waves* 38 147
Nesterenko, N. G. *On algebras representable by triangular matrices* 39 285
Nguen Tkhi Tkh′eu Khoa [Nguyễn Thị Thiêu Hoa], *An oscillation property of the operator* $D(D^2 + 1^2) \cdots (D^2 + n^2)$ *and applications* 39 64
Nikolaev, I. G. *Isotropic metric spaces* 39 408
Nikol′skiĭ, M. S. *The maximum principle in a nonsmooth minimax problem of optimal control* 39 69
Nikulin, V. V. See Alekseev, V. A.
Novikov, E. A., Shutov, Yu. A., and Shokin, Yu. I. *One-step iteration-free methods of solving stiff systems* 38 212
Oĭnarov, R. *On the denseness of the compactly supported functions in weighted spaces, and on weighted inequalities* 38 575
Orël, E. N. *A method for solving optimal control problems* 39 614
Orlovskiĭ, D. G. See Prilepko, A. I.
Ostapenko, V. V. *On the divergence of difference operators defined on a nonuniform difference mesh* 39 206
Palyutin, E. A. *Spectra of varieties* 39 553
Panchenko, V. I. See Kabatyanskiĭ, G. A.
Panin, V. M. *The normalized method of finite penalties in nonlinear programming problems* 39 115
Pankov, P. S. See Imanaliev, M. I.
